SUMMARY

Full-Stack Engineer with expertise in designing, developing, and deploying scalable web applications. Strong ability to optimize application performance, having successfully reduced API response times by 50% and improved database query efficiency by 70%.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, WebRTC, Tailwind CSS, Framer-Motion, GSAP, ShadCN
- **Backend:** Node.js, Express.js, Websockets, Hono, Redis(Pub/Sub), REST APIs, Queues
- **DevOps & Cloud:** AWS, Docker, Azure, CI/CD, Cloudflare Workers, Git & GitHub
- **Databases:** PostgreSQL, MongoDB, MySQL, Prisma ORM
- **Languages:** TypeScript, JavaScript, C++, C, SQL
- **Auth & Tooling:** NextAuth, OAuth, JWT, Zod, OpenAPI

WORK EXPERIENCE

Full-Stack Developer

Crewbella Ecosystems

October 2025

Remote

- Added Redis caching and Sentry monitoring for production reliability.
- Built event creation, ticket booking, QR-based ticketing, and automated ticket delivery via email & WhatsApp.
- Implemented Razorpay webhooks to securely assign tickets only after server-verified payments.
- Integrated Meta WhatsApp Cloud API for transactional messaging and document delivery.
- Developed a feature to export applicant data into structured documents (PDF/CSV) for leads, and automated document delivery to users via WhatsApp using Meta templates.
- Rebuilding the entire Crewbella platform from scratch using Next.js and Express.js, focusing on scalability, performance, and clean architecture.

Full-Stack Developer Intern

GSM Enterprises

August 2025 - October 2025

Remote

- Integrated a new provider into the production environment, ensuring compatibility with existing systems.
- Developed serverless backend workflows using AWS Lambda functions to support core business operations.
- Connected backend APIs with the frontend application, enabling smooth data flow and user interactions.
- Identified and resolved bugs, maintaining application stability and improving reliability in production.

PROJECTS

SyncSides – Real-Time Meeting & Recording Platform

[GitHub] [Live]

TypeScript, Next.js, WebRTC, Socket.io, PostgreSQL, FFmpeg

- Built a full-stack real-time video collaboration platform with P2P streaming, synchronized local recording, and an automated FFmpeg-based post-production pipeline.
- Designed a low-latency WebRTC signaling system (Node.js + Socket.io) with sub-200ms peer setup and a chunk-based upload system handling > 1 GB files without crashes.

EDUCATION

Bachelor of Technology (CSE)

Government Engineering College, Ajmer

Aug 2024 – Jun 2028

Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, System Design.
